Profile

Full-Stack web developer with proven hands-on experience in various coding programs .Skilled in collaborating with cross-functional teams, integrating third-party services and APIs, and optimizing web applications for performance.

Skills

HTML | CSS | Bootstrap | JavaScript | Python | Node.js | Express.js | APIs | MongoDB | React
Git | Docker | Vitest

Projects

Puppy Tail, HTML, Bootstrap, CSS, JavaScript, React, React-Router, Python, SQL, APIs, Jwt. [🔗](#)

- Puppy Tail is a user-friendly web application that connects pet owners with reliable and caring pet care providers. We offer a variety of services to ensure your furry friend's happiness and well-being, from daily walks and playtime to overnight stays and vacation care.
- Prioritizes both convenience and security. Our secure online payment system lets you easily pay for services directly through the web app, ensuring a smooth and seamless experience. We also utilize token-based authentication, a robust security measure that protects your data and keeps your transactions safe.

Sudoku, HTML,CSS, JavaScript, React, Python, FastAPI, Docker, Makefile. [🔗](#)

- Web application that allows users to enter their own 9x9 sudokus for the app to solve in a few seconds.
- It incorporates the possibility of generating incomplete sudokus through a Dosuku API.
- It works using the backtracking search algorithm, exploring all possibilities and reversing when a dead end is reached.

Dental Clinic, HTML, CSS, Tailwind, React, JavaScript, Docker, Makefile [🔗](#)

- Landing page for a dental clinic, designed with Tailwind and React whose objective is to publicize the services and that customers can schedule online.

Professional Experience

Quality Assurance Tester, 4Geeks Academy

Dec 2023 – present

- Cataloging and classification of bugs for efficient management.
- Performing debugging tasks to solve software problems.
- Application of testing using tools such as JEST and Pytest to optimize the code.
- Active participation in daily Scrum meetings to review team progress.
- Specialized in the creation of exercises with step-by-step tutorials on the Learnpack platform to improve the active practice of students.
- Contribution to project development by creating and managing pull requests to implement changes and improvements to the code base.
